

Thank you for choosing Rakumba. We hope you continue to enjoy your light for years to come. To ensure the longevity of your new product, please read the following important information.

Polished Nickel and Powdercoated Surfaces

Both the Polished Nickel and Powdercoated surface options are durable and easy to clean finishes. Avoid touching with bare hands to prevent fingerprints from accumulating, but should these occur, they are easy to clean off following the maintenance routine below.

Acrylic Diffusers

Ramus includes frosted acrylic diffusers. To keep it looking its best, avoid touching with bare hands and keep it free of oils and waxes.

Maintenance Care

1. Regularly remove dust with a clean, dry cloth or dusting wand, particularly from top of light.
2. To remove fingerprints from the polished nickel or powdercoated finishes use a non-abrasive window cleaner sprayed onto a soft cloth. Never spray liquid cleaners directly onto the light fitting. For particularly stubborn marks, methylated spirits may be used.
