CARE INSTRUCTIONS

CODE - RP-E-1604

REVISION 17.02.17

REVISED BY: AB

Rakumba

The ceramic components are fragile. Take care to avoid knocks and bumps that could chip or crack the ceramic or scratch the glazed surface.

Gently remove dust with a soft duster.

To clean, wipe down with a soft, clean, dry cloth. If necessary, glass cleaner can be used.

The LED lightsource is an integrated solution and should not require user replacement for the entire life of the product.
