Our Story

Rakumba is the first light.

We are a committed group of thinkers, designers, makers, artisans and engineers devoted to the creation of beautiful decorative lighting.

For fifty years, we have been making beauty. Today, our strength is drawn from the integration of lighting design with our expert knowledge of each stage of producing great lights. We are proud of our traditional craft and artisan abilities. We share our mastery of technology and manufacturing willingly in true collaborations. Our attention to detail is well known, we have an ardent desire to refine and perfect.

We are an integral part of the design community, continually seeking new connections. We are a forum to exchange ideas and expertise for the designers with whom we engage and whose projects we champion. We are active mentors to a new generation of emerging designers and students of design.

As we celebrate our fiftieth anniversary in 2018, we desire nothing more than to continue to do what inspires us today, uniting design and making to create great lighting, proud of our legacy and anticipating a bright future.

The Rakumba team
Constant Evolution - rakumba.com

Our product range is continually expanding and evolving. Even our familiar product ranges are regularly refreshed with new material options, refined designs and updated lighting technology.

If you’re as keen on pushing the boundaries as we are, please download our latest online catalogue and individual product brochures for the most up to date information.

All materials specifications in this catalogue refer to visible materials. Full materials specifications are available on request. All illumination technical details refer to the bare lightsource data, and are affected by individual product characteristics - specific TTL figures may be available on request.

Making beauty with Studio Truly Truly
Typography

A new language in decorative lighting
Typography, the first collaboration between Rakumba and Studio Truly Truly, is inspired by the way characters form words, and how these can be arranged in relationships to create a language of expression. Typography is a graphic lighting system, reflective of the multi-disciplinary talent of its designers and the manufacturing and specialist technical abilities of Rakumba.

An advanced rail, almost impossibly thin, allows for the complete mobility of any light along the line. With the first Typography collection, CILON, Rakumba introduces seven lighting fixtures, or characters. Each light can be positioned on four sides of the central axis and can be controlled independently of any other. Combining multiple rails in vertical or horizontal orientations enables Typography to be formed into endless expressions; simple pendants, chandeliers and room dividers, almost limitless design solutions. And over time, lights can be moved to new positions, or new lights and rails can be added.

Typography: create your own unique beauty through the compositions and combinations of lights in the CILON collection.

Collaborate with us

Having worked with creatives and taste makers across many different fields, we love to collaborate. We’re experts in problem solving, which is why all our skills and experience come to the fore when we're working with you. And our versatility shows when you look at the variety of materials and manufacturing techniques we’ve worked with.

It’s all part of us making beauty.

Get in touch with us to find out how our expertise will help you get the most out of your project.
For projects which are out of the ordinary, Rakumba partners with architects, designers and clients to create bespoke lighting installations. In this endeavour, more than any other, the Rakumba approach reflects the depth of our experience in creating beautiful lighting. We are partners with our bespoke clients, translating even the most ambitious concept into working product design.

To accommodate fast track development, our technical expertise and manufacturing ability is brought into play, ensuring perfect functionality and reliability. We coordinate all aspects of the project, working with design and build teams in any location.

Regardless of the scale, Rakumba takes particular pride in the advanced thinking combined with a dedicated approach to design/build which distinguish our bespoke offer.
Customisation

We offer an unprecedented level of customisation on the majority of our product range. We place an emphasis on premium quality materials, diverse high quality components and lighting technology ranging from traditional to cutting edge.

The customisations illustrated on the following pages cover a few of the ways we can make specifically fabric based products distinctively your own.

Please refer to www.rakumba.com for individual product specification sheets and contact us to discuss your bespoke requirements.
We design

Our design team has shown that there are many strings to the Rakumba bow. Luckily, all of those strings remain focused on detail and going beyond the ordinary – vital ingredients when making beauty. This has helped us create an extremely varied range of bespoke decorative lighting for custom projects. With each piece having its own character and story, there's always a feature we're proud to draw your attention to.

We manufacture

We control our entire manufacturing process, so we have a deep understanding of what works and what doesn't. But it's our pursuit for perfection that pushes us to try new things, with new materials and new technologies. We're proud to always deliver on time for our clients; we're equipped to handle a project of any scale, whether it's one light or thousands. And it's our people, our experience and our processes that give us this confidence.

It's all part of us making beauty. Get in touch with us to find out how our expertise will help you get the most out of your project.
